COURSE OVERVIEW EE0250 Electrical Distribution Systems – Fundamental

Course Title

Electrical Distribution Systems – Fundamental

Course Date/Venue

February 18-22, 2024/The Mouna Meeting Room, The H Dubai Hotel, Sheikh Zayed Rd - Trade Centre, Dubai, UAE

(30 PDHs)

Course Duration/Credits

Five days/3.0 CEUs/30 PDHs

Course Reference

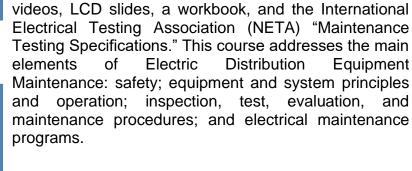

EE0250

Course Description

This course utilizes lectures, student participation,

Discussion of electric safety procedures includes safety awareness, minimum approach distances, care and use of personal protective equipment, lockout-tagout, safety grounding, step and touch potentials, and special hazards of electric power distribution equipment. This course covers electrical safety training as required by OSHA (Occupational Safety and Health Administration USA) for qualified electrical workers.

The types of equipment and systems presented include cables and buses, switchgear circuit breakers, liquidfilled and cast-coil/dry-type transformers, instrument transformers, meters and protective relays, surge arresters, and capacitors.

Discussions include equipment operation and descriptions of the various inspection, testing, evaluation, and maintenance procedures available for the equipment and the test equipment and outage requirements for the various procedures.

The course will include references to British (BS), European (IEC), and United States (ANSI, IEEE, NEC) engineering standards. Participants are encouraged to bring their system single-line diagrams and recent problems for discussion during and after class. Practical electrical inspection, test, evaluation, and maintenance training based on NETA Maintenance Testing Specifications and the course instructor's 30 years experience in the electric power field will be presented.

Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Apply and gain an in-depth knowledge on installation, operation, testing, optimization, maintenance and troubleshooting of electric distribution system equipment
- Explain standards and regulations as well as electric power and dielectric principle
- · Analyze low and medium voltage cable and buses and discuss a general overview of MV and LV equipments
- Describe MV and LV switchgears and circuit breakers and review power and instrument transformers
- Review surge arrestors, capacitors, meters and protective relays
- Employ electrical safety and employ electrical maintenance program
- Perform exercises with troubleshooting electrical circuits V4.1 simulator

Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive "Haward Smart Training Kit" (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes electronic version of the course materials, sample video clips of the instructor's actual lectures & practical sessions during the course conveniently saved in a Tablet PC.

Who Should Attend

This course provides an overview of all significant aspects and considerations of electric distribution system equipment for those who are involved with the planning, implementation, and/or supervision of electrical preventive maintenance (EPM) programs of electric power equipment in industrial plants, process plants, oil/gas fields, refineries, petrochemical plants, utilities and commercial facilities. You should be interested in learning how electrical power distribution equipment and systems operate and how to maintain and troubleshoot the equipment safely and effectively.

Course Fee

US\$ 5,500 per Delegate + VAT. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

Course Certificate(s)

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

Certificate Accreditations

Certificates are accredited by the following international accreditation organizations:-

The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the ANSI/IACET 2018-1 Standard which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the ANSI/IACET 2018-1 Standard.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking Continuing Education Units (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award 3.0 CEUs (Continuing Education Units) or 30 PDHs (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

British Accreditation Council (BAC)

Haward Technology is accredited by the British Accreditation Council for Independent Further and Higher Education as an International Centre. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

Training Methodology

All our Courses are including Hands-on Practical Sessions using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

30% Lectures

20% Practical Workshops & Work Presentations

30% Hands-on Practical Exercises & Case Studies

20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. Ahmed Abozeid is a Senior Electrical Engineer with over 25 years of Onshore & Offshore experience within the Oil & Gas, Refinery, Petrochemical and Power industries. His wide expertise covers HV Cable Design, Cable Splicing & Termination, Cable Jointing Techniques, High Voltage Electrical Safety, HV/MV Cable Splicing, High Voltage Circuit Breaker Inspection & Repair, High Voltage Power System Safe Operation, High Voltage Safety, High Voltage Transformers, Safe Operation of High

Voltage & Low Voltage Power Systems, Electric Distribution System Equipment, Practical Troubleshooting of Electrical Equipment & Control Circuits, Electrical & Control System Testing & Commissioning, LV/MV/HV Circuit Breakers Inspection & Maintenance, Electrical Power Substation Maintenance, Practical High Voltage Safety Operating Procedures, Modern Power System Protective Relaying, Electrical & Control System Testing, Design, Commissioning, Operation and Maintenance of Switchgears, Transformers, Substations, Medium & High Voltage Equipment and Circuit Breakers, Electrical Motors & Variable Speed Drives, Motor Speed Control, Power Electronic Converters, AC Converters Section, Electromagnetic Compatibility (EMC), Motor Failure Analysis & Testing, Machinery Fault Diagnosis, Bearing Failure Analysis Process Control & Instrumentation, Process Control Measurements, Control System Commissioning & Control System & Monitoring, Power Station Control Instrumentation Devices, Process Control & Automation, PID Controller, Distributed Control Systems (DCS), Programmable Logic Controllers (PLC), ABB PLC & DCS System, Gas Analyzers, Simulation Testing, Load Flow, Short Circuit, Smart Grid, Vibration Sensors, Cable Installation & Commissioning, Calibration Commissioning and Site Filter Controller. Further, he is also well-versed in Fundamentals of Electricity, Electrical Standards, Electrical Power, PLC, Electrical Wiring, Machines, Transformers, Motors, Power Stations, Electro-Mechanical Systems, Automation & Control Systems, Voltage Distribution, Power Distribution, Filters, Automation System, Electrical Variable Speed Drives, Power Systems, Power Generation, Power Transformers, Diesel Generators, Power Stations, Uninterruptible Power Systems (UPS), Battery Chargers and AC & DC Transmission. He is currently the Project Manager wherein he manages, plans and implements projects across different lines of business.

Mr. Ahmed worked as the Electrical Manager, Assistant General Technical Manager, Electronics & Instruments Head, Electrical Power & Machine Expert, Electrical Process Leader, Team Leader, Electrical Team Leader, Electronics & Instruments Maintenance Superintendent, Engineering Supervisor, Technical Instructor and Instructor/Trainer from various companies such as the Lafarge Nigeria, Egyptian Cement Company, ECC Training Center, Alrajhi Construction & Building Company and Ameria Cement Company, just to name a few.

Mr. Ahmed has a **Bachelor's** degree in **Electrical Engineering**. Further, he is a **Certified** Instructor/Trainer and has delivered numerous trainings, seminars, courses, workshops and conferences internationally.

Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Dav 1: Sunday, 18th of February 2024

Day 1.	Sunday, 16" Of February 2024
0730 - 0800	Registration & Coffee
0800 - 0815	Welcome & Introduction
0815 - 0830	PRE-TEST
0830 - 0845	Standards & Regulations
	Electric Power & Dielectric Principle
0845 - 0930	Electric & Magnetic Fields & the Electric Power System • Behavior of Dielectric
	(Insulation) Materials • Conducting & Insulating Materials
0930 - 0945	Break
	Electric Power & Dielectric Principles (cont'd)
0945 - 1100	Conducting & Insulating Materials (cont'd) ● Three-Phase Power Calculations ●
	Short-Circuit Currents • Calculations & Equipments & Materials Stress
	Electric Power & Dielectric Principles (cont'd)
1100 - 1230	Electrical Problems & Corrective Actions • Excess Heat & Voltage •
	Deterioration & Contamination • Partial Discharge (Corona)
1230 - 1245	Break
	Low & Medium Voltage Cables & Buses
1245 – 1420	Types • Construction • Applications • Ratings • Cable Joints • Bus Bars &
1245 - 1420	Buses Accessories • Inspections • Tests • Evaluations • Common Failure
	Modes & Failure Location ● Cable/Bus Safety
1420 - 1430	Recap
1430	Lunch & End of Day One

Monday 19th of February 2024 Day 2.

Day 2:	Monday, 19" of February 2024
0730 - 0830	General Overview of MV & LV Equipments
	<i>Types & Applications</i>
	MV & LV Switchgears & Circuit Breakers
0830 - 0930	LV Switchgears Types & Ratings • LV Switchgear Circuit Breakers – Types &
0030 - 0930	Ratings • Overcurrent Sensing • Typical Time-Current-Curves (Tccs) • LV
	Circuit Breakers Selectivity
0930 - 0945	Break
	MV & LV Switchgears Circuit Breakers (cont'd)
0945 - 1100	Types & Ratings of MV Switchgears • MV Switchgear Circuit Breakers - Types,
	Ratings & Operating Mechanisms • Protection Relays
1100 - 1130	MV & LV Switchgear Circuit Breakers (cont'd)
	Inspections & Tests
	Power Transformers
1130 – 1230	Transformers Principles & Parameters • Types & Applications • Connections
1130 - 1230	(Vector Group) • Two-Winding • Zigzag Grounding • Auto-Transformers
	& Tertiaries
1230 – 1245	Break
1245 - 1420	Power Transformers (cont'd)
	Tap Changers • De-Energized Tap Changers (DETC) • Load Tap Changers
	(OLTC) & Controls • Built-on Protections (Buchholz & Similar Relays) •
	Cooling Systems • Fire Fighting
1420 – 1430	Recap
1430	Lunch & End of Day Two

Day 3: Tuesday, 20th of February 2024

Day 3.	ruesuay, 20 Or February 2024
	Power Transformers (cont'd)
0730 - 0930	Parallel Operation of Transformers ● Accessories ● Failure Modes & Detection ●
	<i>Inspections & Tests</i> ● Factory Tests ● Field Tests ● Oil & Gas Analysis
0930 - 0945	Break
	Instrument Transformers
0945 - 1100	Characteristics & Functions • Types & Ratings • Connections • Inspections
	& Tests • Common Failure Modes & CT/VT Safety
1100 1200	Surge Arrestors
1100 – 1200	Types & Ratings ● Inspections & Tests
	Capacitors
1200 - 1230	Types of Banks & Their Connection • Power Factor Correction • Connection
	Points ● Harmonic Considerations ● Inspection & Testing
1230 - 1245	Break
1245 – 1420	Meters & Protective Relays
	Types of Meters & Applications • Types & Application of Protective Relays •
	Typical Connection Diagrams • Measurement Transducers
1420 – 1430	Recap
1430	Lunch & End of Day Three

Day 4: Wednesday, 21st of February 2024

Day 4:	Wednesday, 21 st of February 2024
0730 - 0800	Meters & Protective Relays (cont'd)
	<i>Inspection & Tests</i> ● <i>Meter/Relay Cautions & Safety</i>
	Electrical Safety
0800 - 0930	Hazards Working Near or on Energized Electrical Equipment • Electrical Shock
	& Effects • Arc Flash • Safeguards for Preventing Shock
0930 - 0945	Break
0945 - 1100	Electrical Safety (cont'd)
	De-Energized & Energized Works • Permit to Work • Tools & Test equipment
	Use & Care of Safety Grounding Sets • Use & Care of Electrical Personal
	Protective Equipment Tools & Test equipment
	Electrical Safety (cont'd)
1100 – 1230	Safety Distances • "Qualified Electrical Workers" as Defined by OSHA •
1100 - 1230	Minimum Approach Distances for Non-Qualified and Qualified Electrical
	Workers • Proper Lockout-Tagout Procedures
1230 – 1245	Break
1245 – 1420	Electrical Safety (cont'd)
	Equipment Safety Interlocks • Step & Touch Potential (Definition & Hazards)
1420 – 1430	Recap
1430	Lunch & End of Day Four

Day 5: Thursday, 22nd of February 2024

Day o.	That eacy; 22 of Foot acry 2021
	Electrical Maintenance Program
0730 - 0930	Maintenance Actions • Testing Intervals • International Electrical Testing
	Association (NETA) Specifications
0930 - 0945	Break
0945 – 1100	Practical Exercises with Troubleshooting Electrical Circuits V4.1
	Simulator
1100 – 1230	Practical Exercises with Troubleshooting Electrical Circuits V4.1
	Simulator (cont'd)

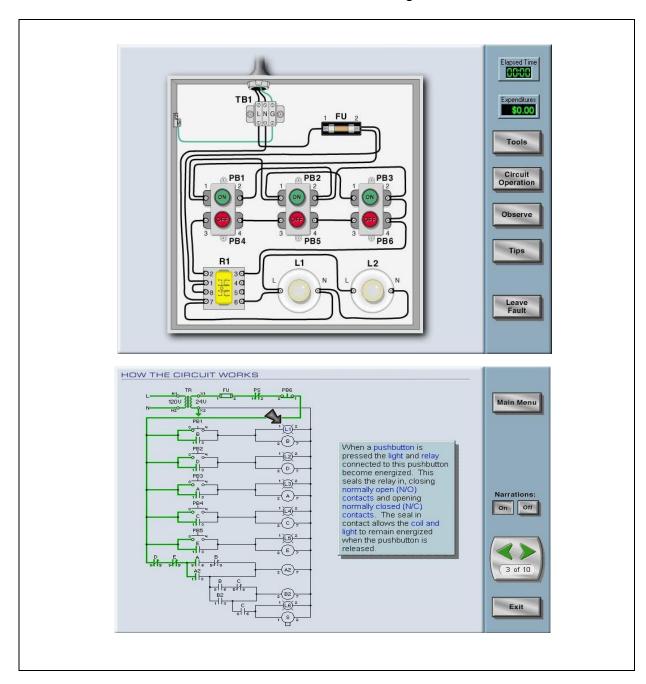

1230 – 1245	Break
1245 - 1345	Practical Exercises with Troubleshooting Electrical Circuits V4.1 Simulator (cont'd)
1345 - 1400	Course Conclusion
1400 – 1415	POST-TEST
1415 - 1430	Presentation of Course Certificates
1430	Lunch & End of Course

Simulator (Hands-on Practical Sessions)

Practical sessions will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using our state-of-the-art simulator "Simutech Troubleshooting Electrical Circuits V4.1".

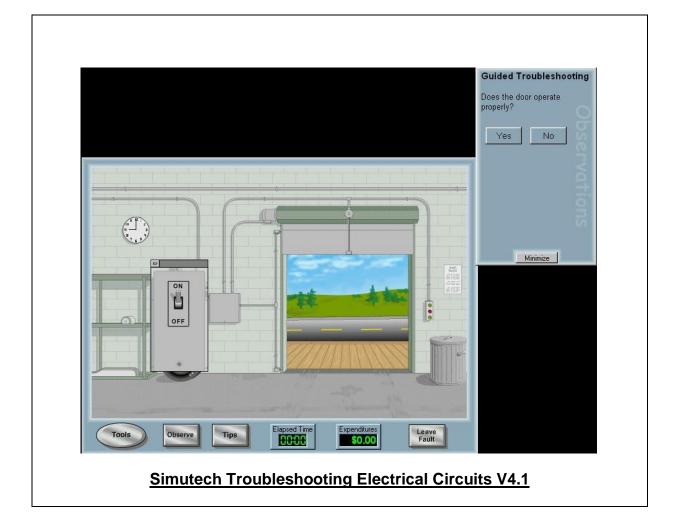

<u>Course Coordinator</u> Kamel Ghanem, Tel: +971 2 30 91 714, Email: <u>kamel@haward.org</u>
