

COURSE OVERVIEW IE0714(KJ1)-4D
Fieldbus/HART Communication and Device Calibration
(Rosemount)

Course Title

Fieldbus/HART Communication and Device Calibration (Rosemount)

Course Date/Venue

December 09-12, 2024 Boardroom, Warwick Hotel Doha, Doha, Qatar

Course Reference

IE0714(KJ1)-4D

Course Duration/Credits

Four days/2.4 CEUs/24 PDHs

Course Description

This practical and highly-interactive course includes various practical sessions and exercises. Theory learnt will be applied using our state-of-the-art simulators.

This course is designed to provide participants with a detailed and an up-to-date overview of fieldbus or hart communication and device calibration. It covers the basic building blocks and design criteria for the field level, low speed and the high speed ethernet network level implementations. It will provide an overview of the fieldbus technology including how it differs from traditional control systems.

The course provides a clear and concise presentation of how to apply FieldBuses for process control. Based on experience collected from end-users in a wide range of industries around the world, the course will provide “how-to” information for all phases of the system lifecycle from engineering to device and strategy configuration, installation, commissioning, troubleshooting, operation, and maintenance.

Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Apply and gain a comprehensive knowledge on fieldbus/HART communication and device calibration (Rosemount)
- Discuss HART and fieldbus communication for smart instrumentation
- Install, configure, calibrate and troubleshoot Rosemount Smart (Fieldbus/HART) devices including pressure transmitter, temperature transmitter and radar level transmitters
- Obtain hands-on training skills on 475 Hart/Fieldbus field communicator
- Install, configure and calibrate the DP flow instruments correctly
- Perform DP flow troubleshooting

Who Should Attend

This course provides an overview of all significant aspects and considerations of Fieldbus/HART communication and device calibration for instrument engineers and technicians.

Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive “Haward Smart Training Kit” (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes **electronic version** of the course materials, sample video clips of the instructor’s actual lectures & practical sessions during the course conveniently saved in a **Tablet PC**.

Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

- 30% Lectures
- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

Course Fee

US\$ 5,000 per Delegate. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

Course Certificate(s)

Internationally recognized certificates will be issued to all participants of the course.

Course Accreditation

Certificates are accredited by the following international accreditation organizations: -

-  The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units (CEUs)** in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **2.4 CEUs** (Continuing Education Units) or **24 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

-  British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. Steve Mark, PE, MSc (on-going), BSc, is a Senior Electrical & Telecommunications Engineer with over 20 years of extensive experience within the Oil & Gas, Petrochemical and Power industries specializing in Overhead Power Line Maintenance Patrolling & Washing, Energy Transmission & Distribution, Transmission Line Structures, Insulators & Accessories, Transmission Line Construction & Maintenance, Insulated Power Cables, High Voltage Applications, Transmission Line Parameters, Sag & Tension of Conductor, Geomagnetic Disturbances, Reactive Power Compensation, Overhead Line

Troubleshooting, Patrolling, Troubleshooting Safety, HV/LV Equipment, High Voltage Electrical Safety, LV & HV Electrical System, HV Equipments Inspection & Maintenance, HV Switchgear Operation & Maintenance, LV Distribution Switchgear & Equipment, Basic Electricity, Electrical & Special Hazards, Personnel Protection, Motor Controllers, Electrical Switching Practices, Emergency Planning, Safety Management, Earthing & Bonding Installation, Energized & De-Energized Work, Protection Relays, Testing & Commissioning, Lock & Tag Out, Circuit Breakers & Switchgears, Portable Cables, Transformers, Surge Arrestors, Isolators & Fuses, Capacitor Banks, Earth & Shunt Reactors, Gas Insulated Substations (GIS), HV Substation Inspection & Reporting, HV Cable Design, HV Electrical System Commissioning, HV Equipments Inspection & Maintenance, UPS & Generators, Electrical Installations Design & Construction, Electrical Mechanical Installations, GIS Substations, GE Turbine Power Plant and Steam Power Plants. Further, he is also well-versed in Network & System Administration, Data/Voice Networking, Network Capacity Calculations, VPN Connection Implementation, Structured Cabling Constructions, Engineering Design, Security Installations Design & Implementation, Logistics Management, IT Analysis, Business Continuity Plan Design, Disaster Recovery Simulations, Supply Chain System Design, Barcode Marking & RFID Applications. He is currently the **Lead Electrical Engineer of Public Power Corporation S.A wherein he is responsible for site manufacturing supervision of works and electrical maintenance support for the existing Steam Electrical Power Plant.**

During his career life, Mr. Mark has gained his expertise and thorough practical experience through handling challenging positions such as being the **IT & Telecommunications Manager, IT & Organization Manager, Logistics Manager, Electrical Engineer, Safety Engineer, Public Works Contractor, IT Support Analyst, Project Supervisor, Systems & Network Administrator, Data Protection Officer, Shop Auditor and Amateur Radio Operator** for various multi-national companies and institutes.

Mr. Mark is a **Registered Professional Engineer**, has a Bachelor degree in **Electrical Engineering** from the **Technical University of Halkida, Euboea, Greece** and currently enrolled for **Master** degree in **Quality Management** from the **Hellenic Open University**. Further, he is a **Certified Instructor/Trainer**, a **Certified Safety Engineer** and a **Certified Data Protection Officer (DPO)**. Moreover, he is a member of Scientific Society of Technological Education of Engineers (EETEM) and has delivered numerous trainings, courses, seminars, workshops and conferences internationally.

Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1: Monday 09th of December 2024

0730 – 0800	Registration & Coffee
0800 – 0815	Welcome and Introduction
0815 – 0830	PRE-TEST
0830 – 1000	What Is the New Advantages of Smart Transmitters?
1000 – 1015	Break
1015 – 1130	HART Overview
1130 – 1200	Foundation of Fieldbus Overview
1200 – 1215	Break
1215 – 1420	Foundation of Fieldbus Overview (cont'd)
1420 - 1430	Recap
1430	Lunch & End of Day One

Day 2: Tuesday 10th of December 2024

0730 – 0930	Control Loop Wiring Practices
0930 – 0945	Break
0945 – 1100	Fieldbus Wiring/Segment Design Function Blocks
1100 – 1215	475 Field Communicator, Configuration and Calibration
1215 – 1230	Break
1230 – 1420	475 Field Communicator, Configuration and Calibration (cont'd)
1420 - 1430	Recap
1430	Lunch & End of Day Two

Day 3: Wednesday 11th of December 2024

0730 – 0930	AMD Device Manager Operation
0930 – 0945	Break
0945 – 1100	Theory of Operation, Installation, Configuration Troubleshooting of the Following Rosemount Devices 3051 C & 3051S Pressure Transmitters
1100 – 1215	Theory of Operation, Installation, Configuration Troubleshooting of the Following Rosemount Devices (cont'd) 3144 & 644 Temperature Transmitters
1215 – 1230	Break
1230 – 1420	Theory of Operation, Installation, Configuration Troubleshooting of the Following Rosemount Devices (cont'd) GWR Level Transmitters
1420 - 1430	Recap
1430	Lunch & End of Day Three

Day 4: Thursday 12th of December 2024

0730 – 0930	Basic DP Flow Fundamentals
0930 – 0945	Break
0945 – 1100	DP Flow Sizing Calculations
1100 – 1215	Multivariable Flow Transmitters
1215 – 1230	Break

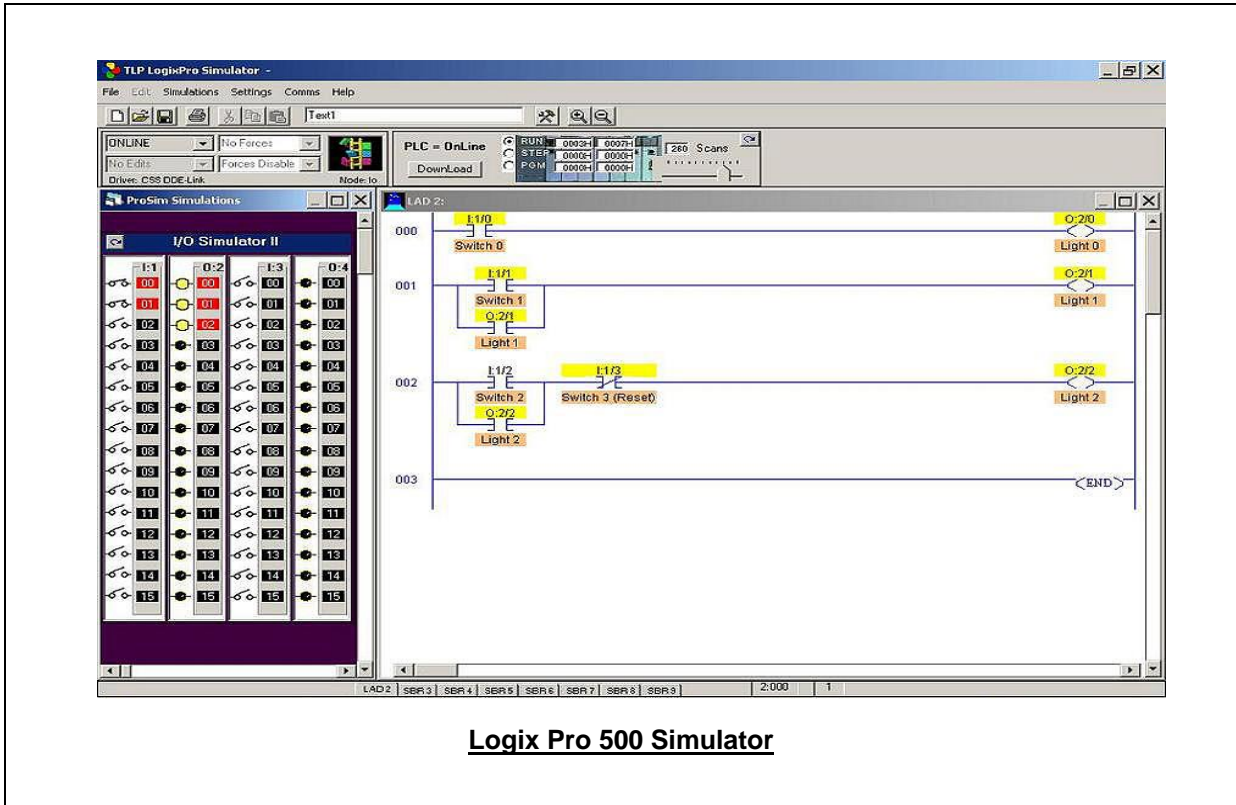

1230 – 1350	<i>Multivariable Flow Transmitters (cont'd)</i>
1350 – 1400	<i>Course Conclusion</i>
1400 – 1415	<i>POST-TEST</i>
1415 – 1430	<i>Presentation of Course Certificates</i>
1430	<i>Lunch & End of Course</i>

Simulator (Hands-on Practical Sessions)

Practical sessions will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using one of our state-of-the-art simulators “AB Micrologix 1000 (Digital)” and “Logix Pro 500”.

Allen Bradley Micrologix 1000 Simulator (Digital)

Logix Pro 500 Simulator
